## TCM 1000 Heavy Duty Tube Cleaning Machine

TCM 1000 HD Machine Has Variable High Speed. TCM 1000 Heavy Duty Technology To Clean All Tubes Efficiently And Effectively. A single operator can easily clean all tubes thoroughly and effectively in minutes

GI Industries For All Your: - Chiller Tube Cleaners, Boiler Tube Cleaners, Industrial Vacuums, Commercial Pressure Washers, Descaling Systems. Bespoke and Custom Systems by Request

The TCM 1000 is a heavy-duty machine for cleaning tough deposits in chillers, condensers, heat exchangers, and other internal tubes. It features a steel cabinet, 1 HP. motor, high speed brush spinning which thoroughly scrubs tube, heavy duty water solenoid for flushing deposits, pneumatic tires, large storage box for tools and brushes, 7.31m power cord, dual auxiliary outlets, and a removable base for confined areas.

If you need a heavy duty machine, put the TCM 1000 to work for you. It is made for industrial cleaning of deposits in chillers, condensers, heat exchangers, boilers and other internal tubes. It features a sturdy powder- coated steel cabinet, 1 HP reversible motor, heavy-duty water solenoid, pneumatic foot pedals and high brush RPMs for powerful scrubbing of internal tubes. Comes complete with vacuum.

### Wet Applications

The unit feeds water through the shaft casing to the cleaning brush or tool, flushing out deposits as they are loosened.

### Dry Applications

The BTA 100 Attachment and a simultaneous vacuum are used to remove loosened deposits.
