

## AG Steriliser & Cleaner

The easiest way to stop mold and bacteria that infest your air conditioner and the room it services. AG Steriliser & Cleaner in a convenient spray for use Air Handling Units (AHU's) Forced Coil Units (FCU's) and other surfaces where contaminants collect.

AG Steriliser & Cleaner is specifically designed for use in air conditioning systems to clean and sterilize air conditioning cooling coils. AG Steriliser & Cleaner kills mold and bacteria and the specially formulated Cleaner sticks to non-horizontal surfaces for longer ensuring effective action on difficult surfaces.

### Contains

Nanoparticles of Cluster Silver. A natural element that has a powerful bactericidal, antiviral and antifungal effect.

### Benefits of Nanotechnology

An increasingly application is the use of silver nanoparticles for antimicrobial coatings, wound dressings. Silver nanoparticles continuously release a low level of silver ions to provide protection against bacteria.

### How To Use AG Steriliser & Cleaner:

1. Wash the coils with detergent and water to remove excess dirt and debris
2. Shake well and apply the AG Steriliser & Cleaner to coils etc
3. Let it dry, and it will start to kill everything off

### Available In Easy To Use:

- 1 Liter Bottle
- 5 Ltr Refill Container

### Kills Mold, Bacteria & Viruses

The product will clean and sterilise against:-

1. Bactericidal activity against **Gram-Negative and Gram-Positive** bacteria including mycobacterium terra.
2. Virucidal activity against viruses of parenteral Hepatitis B and C, HIV Infection, Herpes, Influenza A / H1N1, A / H5N1, SARS-CoV-2, Adenoviruses, Rotaviruses and Fungicidal action (against fungi of the genera Candida and Trichophyton).

### AG Steriliser & Cleaner kills the strain of Influenza A that evolves to H1N1 Virus: -

This means you can kill all of them.

- ✓ H1N1 Virus      ✓ Avian Flu      ✓ Bird Flu      ✓ Spanish Flu      ✓ Swine Flu

Like other strains of the flu, H1N1 is Highly Contagious, allowing it to spread quickly from person to person. A simple sneeze can cause thousands of germs to spread through the air. The virus can linger on tables and surface areas like door knobs, waiting to be picked up.

### Ongoing Preventative Measures

Following treatment with AG Steriliser & Cleaner, for ongoing control of Mold, Odour, Bacteria and Viruses, you may use our Germxit® Gel for air purification in air conditioning systems, general office and residential properties.
